

What can apples teach us about each other!

Apples can display a variety of colors. What colors can you think of? Encourage your students to share their responses. What lessons can apples teach us about people? Just like apples, people come in many different colors. Should that be important? Colors make the world beautiful, just as people do. God created the world with rich colors of people.

Fun Trick!

We discovered that God created people in a variety of beautiful colors. Did you know that He has put something in the apple to remind us of that. If you cut the apple in half (through the middle of the apple), you will reveal something special inside. . Show the kids the inside of the apple. What do you see? A star. God put that star in the apple to remind us to shine our light like a star and love all people, regardless of their color. Everyone is a shining star!
